

Nuclear Accidents - Lessons Learned - Dr. Brian Sheron

This is a YouTube video: **Nuclear Accidents: Lessons Learned from Three Mile Island, Chernobyl, and Fukushima. Presented by Dr. Brian Sheron, Director (Retired) Office of Nuclear Regulatory Research.**

After the Three Mile Island nuclear accident, the Institute of Nuclear Power Operations (INPO) was created to write safety standards, and Emergency Operation Procedures (EOPs). Numerous safety modifications were made at our nuclear plants. The Nuclear Regulator Commission (NRC) put a full time Inspection Officer at every nuclear plant in the United States. Watch the YouTube video of Dr. Brian Sheron speak about all of this.
